<p>Material technical approval for FRP roofing system and steel metals for chlorination building at potable water pump stations Vendor Package.</p> <ol style="list-style-type: none"> CONTRACTOR/Vendor to assess the adequacy of M12 anchor bolts that have been proposed for the corbel area since anchor bolt sizes less than M20 are usually not permitted except for small miscellaneous structures. Furthermore, the use of L-shaped anchor bolts is not recommended as per SABP-Q-001 section 6.1.1 thus CONTRACTOR/Vendor must propose an alternative. All cladding/sheeting material, bolts, fasteners and steel beams must comply with the project specification and all applicable standards. CONTRACTOR/Vendor must ensure that all proposed coating material must comply with the project specification, applicable industry codes and all applicable Saudi Aramco standards that includes but is not limited to SAES-H-001 and SAES-H-101V. Storage of the coating material, preparation of the substrate surfaces as well as the application process must be done in strict adherence to manufacturer's technical datasheets and instructions.
